Good news for homemakers

Be safe in storms

(Continued from page 9)

7. Do not drive a tractor or handle other farm equipment during a storm.

Extra care should be taken to guard against lightning during summer storms. T.V. antennas should be properly grounded, as well as being disconnected from the T.V. set during a storm. Should you see a storm approaching, disconnect your antenna, and also the electrical cord that goes into the outlet.

Stop using electrical appliances during a lightning storm if possible. Keep away from doors and windows. Do not take a shower or bath during storms.

During recent weeks, with the good season we have had in Appomattox County, everyone's grass has needed to be cut at least once a week, and some more often. Please be careful when cutting grass using a power push mower or a riding mower. Do not let children play around where you are cutting grass. Do not let children ride with you while cutting grass on a riding mower. Should you hit a bump or run into any difficulty, it could be most dangerous with a child in your lap or standing on the mower with you.

There have been many accidents where people have had rocks driven into their bodies by a power mower. Please do not let children play around in the area where you are cutting grass. It is so easy for gravels to get over onto the grassy area of the yard and have these gravels thrown into someone if they are in the yard during the cutting operation.

Homemakers, our wish from the Appomattox County Extension Office to you is to have a good safe summer. Please follow all safety precautions with your family members when you are cutting grass or during a summer storm.

If you have a homemaking question or problem, you may call us at 352-8244 or write us at P. O. Box 488, Appomattox, Virginia 24522. Have a safe summer and a good week!
